### LICENCE-FREE SYSTEM

for Frequencies <1 GHz

Wireless M-Bus EN13757

Embedded

## Product Description

The Telit ME50-868 is a wireless M-Bus module compliant with the EN13757 part 4 and part 5 Wireless M-Bus standard.

It is ideally suited for use in one or two-way data links with gas, water, heat and electricity meters and concentrators.

The ME50-868 operates in the 868 MHz band with Tx power of up to 25mW. It runs all Wireless M-Bus modes defined by EN13757-4 and EN13757-5 in the 868 MHz band.

## Key Benefits

- W M-Bus modes by Telit, leave integrators to work on applications
- Wide area coverage
- Very low consumption for battery powered applications

## Family Concept

The Telit portfolio of short range wireless modules is comprised of a wide range of innovative solutions ranging from ready-to-use wireless radio modems to OEM modules and RF design services.

Operating in the license-free ISM frequency bands of 169, 433, 868, 915 MHz, and 2.4 GHz, they're available in both standard air-interface protocols such as wireless M-Bus and ZigBee as well as proprietary low-power, low data rate technologies.

Telit pre-certified short range modules share small dimensions, form factor, and are pin2pin compatible with one-another, which enables re-use of your design with different modules and air interface technologies as needed to meet your business and environmental requirements. Telit also offers a full set of tools to shorten and streamline your design effort.
